

Gentlemen,

I would like to convey my concerns over a movement to allow new LPFM stations to dominate the airways and potentially eliminate radiostations like the K-Love Radio network. I searched for many years through one depressing station after another until I finally landed on a K-Love Station. This broadcaster actually plays a program that lifts your spirits and lends positive reinforcement to your day. With so few things in our environment today that improve our outlook on life and encourage us throughout the day. It would be a shame to lose such a powerful resource to the American people as this network provides. Please reconsider the effects that this decision could potentially have on our society. After all this is a listener supported Network. That alone should convey how many people would suffer from such a loss.

Sincerely,
Gordon Milbach
